Aubonne, Switzerland, January 10, 2012

Swissvoice IH 250 first CAT-iq 2.0 certified handset

Swissvoice, the swiss telecommunication leading company specialized in cordless telephony is proud to announce that its new IH250 handset has received CAT-iq 2.0 certification from the DECT forum. This certification program tests devices on protocol compliancy, on radio frequency and on audio quality, which is one of the most distinctive features of CAT-iq v2.

CAT-iq 2.0 technology (Cordless Advanced technology – Internet and Quality) delivers the full potential of IP networks and offers wideband voice, multi-line telephony, three- party conferencing, call transfer and phonebook synchronization as well as several other innovative features. The DECT Forum is the globally acting industry association embracing suppliers and operators of DECT based terminals, systems, and networks.

IH 250 handset implements state of the art HD voice (High Definition voice) from swissvoice, including wideband audio, high quality full duplex hands-free mode, high quality polyphonic ringing and an excellent natural audio quality for customer conversations.

Swissvoice has a long history of developing and marketing ISDN multiline phones, and has implemented the best of its multiline management capabilities in this CAT-iq v2 handset.

Swissvoice IH250 handset implements SUOTA (Software Upgrade Over the Air) which allows to seamlessly upgrade a new software of handset through the air. This robust process allows IH250 handset to be future proof and allows service evolutions on the field.

The IH 250 is interoperable with other CAT-iq 2-0 certified handsets, base stations or gateways. The IH 250 handset is expected to be launched first quarter 2012

"This achievement is a new proof of Swissvoice pioneer role in the industry of cordless telephony, since its early days to its latest development" said Mr Lebrun CEO of Swissvoice

Swissvoice, established in Switzerland since 1893, is a manufacturer of communication products for demanding consumers. Swissvoice signature is health and environment consciousness, product design and audio performance.
