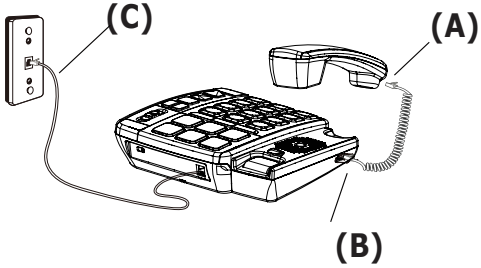
INSTALLATION

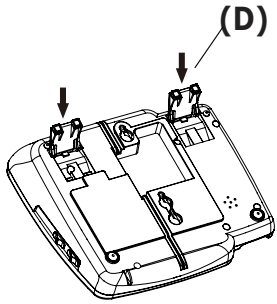
Recommandations

- Do not expose the phone to direct sunlight or excessive temperature.
- Operating temperature between + 5 ° C and + 40 ° C.
- Your phone must be installed at least 1 meter away from radio equipment such as television, cell phone, etc.

Telephone installation

- Your phone should be placed on a flat surface for more stability. Plug the coiled cord into the handset (A) and into the socket on the left side of the phone (B).
- Plug the telephone cord into the socket at the back of the set and into the wall outlet (C) or into the telephone port of the internet box. For desktop position, raise the 2 feet under the base (D).





Wall mounting

- Fold the 2 feet under the base (D).
- Flip the small plastic piece on the base (14).
- Drill two 6mm holes spaced 100mm apart. Insert 2 wall plugs and screw in the wood screws (3.5 mm in diameter and 30 mm long).
- Mount the base to the 2 screws by pulling it downwards.

Insert a photo (or the SOS label) on one of the 6 memory keys

- Remove the transparent cover attached to the photo memory button.
- Cut out the chosen photo using the provided photo cutting guide.
- Put the photo on the key and replace the transparent cover on the photo.

GENERAL USE

Make a call

- Pick up the handset or press the key.
- Dial the number using the keypad.
- To end the call : Put back the handset on the base or press the key.

Call from memories or emergency number (SOS)

- Pick up the handset or press key.
- Press the photo key, M1, M2 or SOS according to your choice. To register a number on these keys, see "Program memory keys."
- At the end of the call, hang up the handset or press key.

Dial back an outgoing number

- Pick up the handset or press the key.
- Press the key.

Answering a call

- To answer : pick up the handset or press the key (hands-free mode).
- To hang up : replace the handset on the base or press the key.

Set hands-free volume

- During (hands-free) conversation.
- Press to increase the volume.
- Press to decrease the volume.
- 8 levels can be selected.

Set handset volume (And audio-boost)

During handset conversation, 2 modes of amplification are available:

- **Standard mode**

Press ▲ or ▼ to increase or decrease (4 levels).

- **Audio boost mode** (extra strong up to + 30dB)

During handset conversation, press the key. Press this button again to stop amplification.

A slider on the back of the phone (AMPLIFY) is used to always activate the audio boost function. By default, the position is "OFF" If it is in the "ON" position, the audio boost will be automatically activated at each call.

Handset receiver equalizer adjustment

Slide the switch to adjust the handset receiver sound frequency pitch (bass or treble) .

PROGRAMMING

Program memory keys (SOS, photos and M1, M2)

1) Pick up the handset.
2) Press .
3) Dial the phone number to be stored, eg 0612345678.
4) Press the memory key dedicated to this number (SOS, Photos, M1 orM2). The SOS number is the one you want to reach in case of emergency.
5) Hang up the handset. It is advisable to make a test to verify the registered number is correct.
6) To change the number, repeat the procedure from 1).

Setting flash time

By default, the programmed flash time is 300ms . If change is needed:

- 1 + 3 / / / 3 / 1 / = 100ms
- 1 + 3 / / / 3 / 2 / = 300ms
- 1 + 3 / / / 3 / 3 / = 600ms

Setting tone or pulse mode

By default, the TONE mode is programmed. To modify it:

- 1 + 3 / / / 2 / 2 / = pulse
- 1 + 3 / / / 2 / 1 / = tone

SECURITY

Do not use your telephone to report for a gas leak or other potential explosion hazard. Do not try to open your phone to avoid electrical shock. Your telephone must be installed in a dry place, away from heat, humidity and direct sunlight.

ENVIRONNEMENT

This symbol means that your inoperative appliance must be collected separately and not mixed with the household waste.

Help us preserve the environment in which we live!
